

Kathir S

Senior Product Designer · Enterprise B2B SaaS, Multi-Tenant Platforms, Industrial IoT · Design Systems, Data-Heavy Dashboards, Web and Mobile

skathirsurya@gmail.com · +91 7305670990 · kathirdesign.github.io · linkedin.com/in/iamkathir · Bangalore, India

Open to Senior Product Designer, Lead Product Designer, and Senior UX Designer roles · Bengaluru, Hybrid, or Remote

SUMMARY

Senior Product Designer with 8 years designing enterprise B2B SaaS, multi-tenant platforms, and industrial IoT systems used by operators in high-stakes environments. Founding designer of a multi-tenant Asset Operations Platform across five industrial verticals, growing ARR ~3x from \$60K to \$200K+ across 100+ enterprise tenants while reducing configuration time ~60% and support tickets ~75%. Owns end-to-end UX design and UI design: discovery and user research, information architecture, user flows, wireframing, high-fidelity prototyping in Figma, design systems, WCAG AA accessibility, and engineering handoff across web and mobile. Electrical and electronics engineering background, fluent in Agile delivery, cross-functional stakeholder management, design leadership and mentoring, and an AI-native design practice with human judgment held at every decision point.

EXPERIENCE

Senior Product Designer Jun 2021 - Jun 2026
[Hash8.io](https://hash8.io) · Hosur, India

Founding and sole designer through 2024, then design lead for a growing function. Multi-tenant Asset Operations Platform across five industrial verticals, serving enterprise customers in chemicals, manufacturing, energy, and water utilities.

PLATFORM DESIGN AND PRODUCT STRATEGY

- Founded and owned end-to-end product design for the **Asset Operations Platform**, the company's primary revenue-generating product, growing ARR **~3x from \$60K to \$200K+** across **five industrial verticals** and 100+ enterprise tenants.
- Architected the multi-tenant administration layer covering nested organization hierarchies, **RBAC and ABAC access control**, and device lifecycle management across six industrial asset classes, reducing configuration time **~60%** and support tickets **~75%**.

DASHBOARDS AND DATA-HEAVY INTERFACES

- Designed **single-pane-of-glass dashboards**, configurable grid reports, filterable data tables, comparison views, complex forms, and multi-step configuration workflows across four vertical applications, surfacing KPIs, alert insight, and asset health as the default operator landing surface.

DIGITAL TWIN FRAMEWORK

- Designed user flows, task flows, and interactive **Figma prototypes** for a unified **digital twin framework** spanning asset, system, process, and entity twins, fused with real-time telemetry, historical event records, on-demand state snapshots, and remote-actionable controls.
- Introduced visual simulation, time-lapse replay, breadcrumb tracking, and predictive maintenance incident detection, validating interaction design through **usability testing** with field operators and domain stakeholders.

NOTIFICATION SYSTEM

- Designed a centralized, application-agnostic **notification system** with escalation hierarchies, role- and shift-based routing, throttling, and **alert-fatigue analytics** that back-trace an alarm to root cause, holding signal above noise for on-call operators.

DESIGN SYSTEMS IN FIGMA

- Built **Geist**, a mobile **component library** for iOS and Android covering components, variants, and interaction patterns with **WCAG AA** foundations, reducing mobile rework **~80%** and accelerating design rollouts **~4x**; adopted as the shared library as the design function grew from one to three designers.

USER RESEARCH AND UX STRATEGY

- Ran user research, customer discovery interviews, persona development, **customer journey mapping**, and heuristic evaluation with field operators and enterprise stakeholders, translating complex business requirements into information architecture, user flows, and validated product decisions.

SMART FACTORY PLATFORM, TGSIN

- Led a **10-person cross-functional team** to design **TGSIN**, an Industry 4.0 smart factory platform for a Toyota Group Tier 1 supplier covering plant digital twins, 4M analysis, OEE and APQ analytics, and energy management; the submission was **selected by Toyota India** over competing firms.

AI-NATIVE DESIGN PRACTICE

- Introduced an **AI-native design workflow** using Claude, Claude Code, and Cursor for research synthesis, competitive analysis, specification writing, and rapid concept experimentation, building reusable custom skills and MCP-connected pipelines while keeping human judgment at every design decision.

DESIGN LEADERSHIP AND MENTORING

- Grew and mentored the design function from **one to three designers** with autonomous vertical ownership, establishing design operations standards for component library governance, design reviews, design critique, engineering handoff, and **responsive design** patterns.
- Drove **cross-functional stakeholder alignment** with product, engineering, and enterprise clients through design reviews, **Agile** sprint ceremonies, and customer discovery, and contributed product whitepapers and investor pitch narratives that shaped platform positioning.

UX/Product Designer

Jul 2018 - May 2021

Teezle · Chennai, India

Connected-vehicle and fleet IoT products for the North American telematics market. Progressed from UI Trainee to Marketing Analyst to UX/Product Designer.

CONNECTED VEHICLE AND FLEET TELEMATICS

- Coordinated feature design across **Shell Fitcar** personal and commercial-line fleet systems and ran **usability testing** and user research on a Fortune 500 connected-vehicle telematics app built on OBD-II telemetry, covering driver behavior scoring, gamification, predictive maintenance, and usage-based insurance telematics.

FLEET MANAGEMENT PORTAL

- Designed a dealer-side **fleet management and tracking portal** for **North America's largest Blue Bird school bus dealer**, covering role-based access, real-time location tracking, maintenance workflows, and operational reporting.

B2B BILLING AND SUBSCRIPTION PLATFORM

- Designed an end-to-end **B2B billing and subscription platform** covering customer lifecycle management, product catalog, template-driven invoicing, device activation, taxation, and revenue recognition, modeling dealer-to-customer monetization flows through journey mapping before wireframing.

PRODUCT STRATEGY AND COMMUNICATION

- Co-published a **Solution Management whitepaper** and partnered with the CEO on investor pitch decks, go-to-market narratives, and competitive analysis for the North American fleet IoT market.

SKILLS & TOOLS

Design & Craft	Figma, FigJam, Whimsical, Balsamiq, Marvel, UX design, UI design, interaction design, visual design, information architecture, wireframing, low-fidelity and high-fidelity prototyping, micro-interactions, engineering handoff
Design Systems	Component library, variants, design tokens, atomic design, responsive design, WCAG 2.1 AA accessibility, Material Design, Human Interface Guidelines, MUI, design operations, system governance, documentation
Research	User research, user interviews, contextual inquiry, personas, customer journey mapping, user flows, task flows, usability testing, heuristic evaluation, concept experimentation, research synthesis, requirement analysis
Enterprise UX	Dashboards, data visualization, filterable grid reports, complex forms, multi-step workflows, admin consoles, onboarding and configuration flows, role-based experiences, operator and field UX
Product Strategy	Product strategy, design strategy, zero-to-one product definition, functional analysis, success metrics and event definition, Jobs-to-be-Done, Kano Model, Value Proposition Design, Blue Ocean Strategy
AI-Native Practice	Claude, Claude Code, ChatGPT, Gemini, Cursor, Figma AI, Lovable, v0, NotebookLM, Perplexity, AI-assisted research synthesis, prompt design, MCP workflows, agentic UX patterns, human-in-the-loop design
Domain	Multi-tenant SaaS, enterprise B2B software, PaaS, industrial IoT, Industry 4.0, digital twins, fleet telematics, RBAC and ABAC access control, B2B billing and subscription, platform design
Process	Agile, Scrum, design thinking, Double Diamond, systems thinking, first principles, design reviews, design critique, cross-functional collaboration, stakeholder management, design leadership, mentoring
Technical Fluency	HTML, CSS, and JavaScript fundamentals, design-to-code handoff, API and data-model literacy, Jira, Confluence, Notion, Obsidian

LANGUAGES

English (Fluent), Tamil (Native)

EDUCATION

Bachelor of Engineering, Electrical and Electronics Engineering

2018

Ramco Institute of Technology, Anna University · CGPA 8.1

HSC (Class XII), YRTV Matric HSS, 2014, 83% · SSLC (Class X), YRTV Matric HSS, 2012, 94%
