Open to Senior/Lead Product Designer roles · Bengaluru, Chennai, or Remote

SUMMARY

Senior Product Designer with 8 years shipping enterprise SaaS and industrial IoT products for high-stakes operational environments. Founding designer of a multi-tenant Asset Operations Platform spanning five industrial verticals — growing ARR ~3x (\$60K to \$200K+), cutting configuration time ~60%, and reducing support tickets ~75%. Led a 10-person team on a Toyota-selected smart factory platform; built a WCAG AA mobile design system; grew the design function from one to three designers. AI-augmented in practice, human deliberately in control.

EXPERIENCE

Senior Product Designer

Apr 2021 - Jun 2026

[Hash8.io](https://hash8.io) · Hosur, India

Sole founding designer on a multi-tenant enterprise Asset Operations Platform — five industrial verticals; enterprise customers across chemicals, manufacturing, energy, and water utilities.

PLATFORM ADMINISTRATION

- Founded and led product design for the **Asset Operations Platform** — the company's primary revenue-generating product — growing ARR ~3x from \$60K to \$200K+ across five industrial verticals
- Architected the administration layer: nested organization hierarchies, **RBAC and ABAC access control**, and device lifecycle management across six industrial asset classes — reducing configuration time ~60% and support tickets ~75%

DIGITAL TWIN FRAMEWORK

- Designed a unified **digital twin framework** — asset, system, process, and entity twins fused with real-time telemetry, historical event records, and remote-actionable controls — delivered through user flows, task flows, and interactive **Figma prototypes**
- Introduced visual simulation, time-lapse replay, breadcrumb tracking, and predictive maintenance incident detection; validated interaction designs through **usability testing** with field operators and domain stakeholders

DASHBOARDS & ANALYTICS

- Designed **single-pane-of-glass dashboards**, configurable grid reports, and trend analytics across four applications — surfacing KPIs, alert insights, and asset health as the default operator landing surface

NOTIFICATIONS & PLATFORM SYSTEMS

- Designed a centralized, application-agnostic **notification system** with escalation hierarchies, role- and shift-based routing, throttling, alert-fatigue analytics, geofence management, and live map-based asset tracking

GEIST DESIGN SYSTEM

- Built **Geist**, a mobile **component library** for iOS and Android on atomic design principles — tokens, components, and patterns with **WCAG AA** accessibility foundations — reducing mobile rework ~80% and accelerating design rollouts ~4x

SMART FACTORY — TGSIN

- Led a **10-person cross-functional team** to design **TGSIN**, an Industry 4.0 smart factory platform for a Toyota Group Tier 1 supplier (plant digital twins, 4M analysis, OEE/APQ analytics, energy management); submission **selected by Toyota India** over competing firms

DESIGN LEADERSHIP

- Drove cross-functional **stakeholder alignment** across product, engineering, and enterprise clients through design reviews, Agile sprint ceremonies, and customer discovery sessions
- Grew and mentored the design function from **one to three designers** with autonomous vertical ownership; established design ops standards for component library governance, handoff, and responsive design patterns

Product Designer

Jul 2018 - Mar 2021

Teezle · Chennai, India

Consumer and dealer fleet IoT across insurance telematics, usage-based insurance, and fleet management — with early product strategy for the North American market.

SHELL FITCAR — FORTUNE GLOBAL TOP 25 CONSUMER FLEET IOT

- Designed features and ran usability testing for **Shell Fitcar** — a **Fortune Global Top 25** consumer fleet IoT app built on OBD-II telemetry — building domain depth across driver-behaviour scoring, gamification, predictive maintenance, and **Usage-Based Insurance (UBI)** in Insurance Telematics and Fleet Management

FLEET MANAGEMENT PORTAL

- Designed a dealer-side **fleet management and tracking portal** for **North America's largest Blue Bird school bus dealer** — RBAC, real-time location tracking, maintenance workflows, and operational reporting with responsive design for desktop and tablet

B2B BILLING & SUBSCRIPTION PLATFORM

- Designed an end-to-end **B2B billing and subscription platform**: customer lifecycle management, product catalog, template-driven invoicing, device activation, taxation, and revenue recognition; applied **customer journey mapping** to model dealer-to-customer monetization flows before wireframing

PRODUCT STRATEGY & COMMUNICATION

- Co-published a **Solution Management whitepaper**; collaborated with the CEO on investor pitch decks, GTM narratives, and competitive analysis for the North American fleet IoT market

SKILLS & TOOLS

Design & Craft	Figma, Adobe XD, Whimsical, Balsamiq, Marvel — UX design, UI design, visual design, interaction design, information architecture, prototyping, wireframing, engineering handoff
Design Systems	Component library, design tokens, atomic design — responsive design, WCAG AA accessibility, design operations
Research	User research, user interviews, customer journey mapping, user flows, usability testing, A/B testing, stakeholder management, functional analysis, requirement analysis
Product Strategy	Jobs-to-be-Done, Kano Model, Blue Ocean Strategy, Value Proposition Design — product strategy, design strategy, problem reframing
Domain	Multi-tenant SaaS, enterprise software, industrial IoT, platform design, RBAC & ABAC access control, Insurance Telematics, Usage-Based Insurance (UBI), Fleet Management
Process	Design thinking, Agile, Scrum, design reviews, design critique, cross-functional collaboration, design leadership, mentorship
AI & Prototyping	Claude, ChatGPT, Gemini, Cursor, Figma AI, Perplexity, Lovable, v0 — AI-native workflow, rapid concept validation
Frameworks	Double Diamond, Systems Thinking, First Principles, Heuristic Evaluation, Convention over Configuration

LANGUAGES

English — Fluent Tamil — Native

EDUCATION

B.E. Electrical & Electronics Engineering	2018
Ramco Institute of Technology · CGPA 8.1	
HSC (Class XII)	2014
YRTV Matric HSS · 83%	
SSLC (Class X)	2012
YRTV Matric HSS · 94%
