SUMMARY

Senior Product Designer with 8 years designing complex industrial IoT systems and enterprise SaaS platforms built for users in high-stakes operational environments. Founding designer of a multi-tenant Asset Operations Platform across five industrial verticals — grew ARR ~3x (\$60K to \$200K+), reduced configuration time ~60%, and cut support tickets ~75%. Electrical engineering background; experienced in end-to-end design leadership, cross-functional stakeholder management, design systems, WCAG AA accessibility, and Agile delivery. AI-augmented in practice, human deliberately in control.

EXPERIENCE

Senior Product Designer

Apr 2021 – May 2026

[Hash8](#) · Hosur, India

Founding designer on a multi-tenant enterprise Asset Operations Platform — five industrial verticals; enterprise customers across chemicals, manufacturing, energy, and water utilities.

PLATFORM ADMINISTRATION The control plane for industrial IoT — where org complexity becomes operational clarity.

- Founded and led product design for the **Asset Operations Platform** — the company's primary revenue-generating product — growing **ARR ~3x from \$60K to \$200K+** across **five industrial verticals**.
- Architected the administration layer: nested organization hierarchies, **RBAC and ABAC access control**, and device lifecycle management across six industrial asset classes — reducing **configuration time ~60%** and **support tickets ~75%**.

DIGITAL TWIN FRAMEWORK Mirror the field. Master the outcome — before reality forces the decision.

- Designed **user flows**, task flows, and interactive Figma prototypes for a unified **digital twin framework** — asset, system, process, and entity twins fused with real-time telemetry, historical event records, and remote-actionable controls.
- Introduced **visual simulation, time-lapse replay, breadcrumb tracking**, and predictive-maintenance incident detection; validated interaction designs through **usability testing** with field operators and domain stakeholders.

DASHBOARDS & ANALYTICS Signal over noise — decisions surfaced the moment you land.

- Designed **single-pane-of-glass dashboards**, configurable grid reports, and **trend analytics** across four applications — surfacing KPIs, alert insights, and asset health as the default operator landing surface.

NOTIFICATIONS & PLATFORM SYSTEMS The quiet systems that make a platform feel alive.

- Designed a centralized, application-agnostic **notification system** with escalation hierarchies, role- and shift-based routing, throttling, and alert-fatigue analytics — alongside **geofence management** and live map-based asset tracking.

GEIST DESIGN SYSTEM Atoms to applications — consistency, engineered.

- Built **Geist**, a **mobile component library** for iOS and Android on atomic-design principles — **design tokens**, components, and patterns with **WCAG AA** foundations — reducing mobile rework **~80%** and accelerating design rollouts **~4x**.

SMART FACTORY — TGSIN The factory, made legible — from blueprint to bottleneck.

- Led a **10-person cross-functional team** to design **TGSIN**, an Industry 4.0 smart factory platform for a **Toyota Group** Tier 1 supplier (plant digital twins, 4M analysis, OEE/APQ analytics, energy management); submission **selected by Toyota India** over competing firms.

DESIGN LEADERSHIP Building product thinkers — not just product doers.

- Managed cross-functional **stakeholder management** with product, engineering, and enterprise clients through **design reviews, Agile** sprint ceremonies, and customer discovery sessions.
- Grew and **mentored the design function from one to three designers** with autonomous vertical ownership; established design-ops standards for component-library governance, handoff, and **responsive design** patterns.

Product Designer
Teezle · Chennai, India

Jul 2018 - Mar 2021

Dealer-facing fleet IoT products and early product strategy for North America's school-bus ecosystem.

FLEET MANAGEMENT PORTAL Mission-critical fleets, made manageable.

- Designed a dealer-side **fleet management and tracking portal** for North America's largest **Blue Bird** school bus dealer — RBAC, real-time location tracking, maintenance workflows, and operational reporting with **responsive design** for desktop and tablet.

B2B BILLING & SUBSCRIPTION PLATFORM From device sold to revenue recognized.

- Designed an end-to-end **B2B billing and subscription platform** — customer lifecycle, product catalog, template-driven invoicing, device activation, taxation, and revenue recognition; applied **customer journey mapping** to model dealer-to-customer monetization.

PRODUCT STRATEGY & COMMUNICATION Where ideas earn their audience.

- Co-published a **Solution Management whitepaper** and partnered with the CEO on investor pitch decks, GTM narratives, and **competitive analysis** for the North American fleet IoT market.
- Trained across software engineering (HTML, CSS, JavaScript), marketing analysis, and early product strategy — establishing a **multi-disciplinary product design mindset**.

SKILLS & TOOLS

Design & Craft	Figma, Adobe XD, Whimsical, Balsamiq, Marvel — UX design, UI design, visual design, interaction design, information architecture, prototyping, wireframing, engineering handoff
Design Systems	Component library, design tokens, atomic design — responsive design, WCAG AA accessibility, design operations
Research	User research, user interviews, customer journey mapping, user flows, usability testing, A/B testing, stakeholder management, functional analysis, requirement analysis
Product Strategy	Jobs-to-be-Done, Kano Model, Blue Ocean Strategy, Value Proposition Design — product strategy, design strategy, problem reframing
Domain	Multi-tenant SaaS, enterprise software, industrial IoT, platform design, RBAC and ABAC access control
Process	Design thinking, Agile, Scrum, design reviews, design critique, cross-functional collaboration, design leadership, mentorship
AI & Prototyping	Claude, ChatGPT, Gemini, Cursor, Figma AI, Perplexity, Lovable, v0 — AI-native workflow, rapid concept validation
Frameworks	Double Diamond, Systems Thinking, First Principles, Heuristic Evaluation, Convention over Configuration

LANGUAGES

English — Fluent, Tamil — Native
